## Author Index—Volume 43 (2002)

(The issue number is given in front of page numbers)

- Bai, Z.**, Krylov subspace techniques for reduced-order modeling of large-scale dynamical systems (1,2) 9–44
- Bao, W. and S. Jin**, Error estimates on the random projection methods for hyperbolic conservation laws with stiff reaction terms (4) 315–333
- Barrio, R. and J.M. Peña**, Numerical evaluation of the  $p$ th derivative of Jacobi series (4) 335–357
- Börm, S.**, see **Hackbusch, W.** (1,2) 129–143
- Brenner, S.C.**, Smoothers, mesh dependent norms, interpolation and multigrid (1,2) 45–56
- Castellanos, J.L., S. Gómez and V. Guerra**, The triangle method for finding the corner of the L-curve (4) 359–373
- Dahl, F.A.**, Variance reduction for simulated diffusions using control variates extracted from state space evaluations (4) 375–381
- Discacciati, M., E. Miglio and A. Quarteroni**, Mathematical and numerical models for coupling surface and groundwater flows (1,2) 57–74
- Djouad, R. and B. Sportisse**, Partitioning techniques and lumping computation for reducing chemical kinetics. APLA: An automatic partitioning and lumping algorithm (4) 383–398
- Elman, H.C.**, Preconditioners for saddle point problems arising in computational fluid dynamics (1,2) 75–89
- Fish, J.**, see **Korneev, V.** (4) 399–421
- Flaherty, J.E.**, see **Korneev, V.** (4) 399–421
- Forsgren, A.**, Inertia-controlling factorizations for optimization algorithms (1,2) 91–107
- García-Archilla, B., J. Novo and E.S. Titi**, Postprocessing Fourier spectral methods: The case of smooth solutions (3) 191–209
- Gómez, S.**, see **Castellanos, J.L.** (4) 359–373
- Gould, N.I.M. and P.L. Toint**, An iterative working-set method for large-scale nonconvex quadratic programming (1,2) 109–128
- Griffiths, D.F. and G.A. Watson**, Editorial (1,2) 1
- Guerra, V.**, see **Castellanos, J.L.** (4) 359–373
- Hackbusch, W. and S. Börm**,  $\mathcal{H}^2$ -matrix approximation of integral operators by interpolation (1,2) 129–143
- Huang, H.T.**, see **Li, Z.C.** (3) 253–273
- Huang, J. and J. Zou**, Construction of explicit extension operators on general finite element grids (3) 211–227
- Iserles, A.**, Think globally, act locally: Solving highly-oscillatory ordinary differential equations (1,2) 145–160
- Jin, S.**, see **Bao, W.** (4) 315–333
- Jüngel, A. and S. Tang**, A relaxation scheme for the hydrodynamic equations for semiconductors (3) 229–252
- Korneev, V., J.E. Flaherty, J.T. Oden and J. Fish**, Additive Schwarz algorithms for solving  $hp$ -version finite element systems on triangular meshes (4) 399–421

- Kress, R. and L. Kühn**, Linear sampling methods for inverse boundary value problems in potential theory (1,2) 161–173
- Kühn, L.**, see **Kress, R.** (1,2) 161–173
- Leimkuhler, B.**, An efficient multiple time-scale reversible integrator for the gravitational  $N$ -body problem (1,2) 175–190
- Li, Z.C. and H.T. Huang**, Global superconvergence of simplified hybrid combinations of the Ritz–Galerkin and FEMs for elliptic equations with singularities II. Lagrange elements and Adini's elements (3) 253–273
- MacMullen, H., E. O'Riordan and G.I. Shishkin**, The convergence of classical Schwarz methods applied to convection–diffusion problems with regular boundary layers (3) 297–313
- Maroni, P. and M. Mejri**, The  $I_{(q,\omega)}$  classical orthogonal polynomials (4) 423–458
- Márquez, A.**, see **Meddahi, S.** (3) 275–295
- Meddahi, S. and A. Márquez**, A combination of spectral and finite elements for an exterior problem in the plane (3) 275–295
- Mejri, M.**, see **Maroni, P.** (4) 423–458
- Miglio, E.**, see **Discacciati, M.** (1,2) 57–74
- Novo, J.**, see **García-Archilla, B.** (3) 191–209
- Oden, J.T.**, see **Korneev, V.** (4) 399–421
- O'Riordan, E.**, see **MacMullen, H.** (3) 297–313
- Peña, J.M.**, see **Barrio, R.** (4) 335–357
- Quarteroni, A.**, see **Discacciati, M.** (1,2) 57–74
- Rice, J.R., P. Tsompanopoulou and E. Vavalis**, Fine tuning interface relaxation methods for elliptic differential equations (4) 459–481
- Shishkin, G.I.**, see **MacMullen, H.** (3) 297–313
- Sportisse, B.**, see **Djouad, R.** (4) 383–398
- Tang, S.**, see **Jüngel, A.** (3) 229–252
- Titi, E.S.**, see **García-Archilla, B.** (3) 191–209
- Toint, P.L.**, see **Gould, N.I.M.** (1,2) 109–128
- Tsompanopoulou, P.**, see **Rice, J.R.** (4) 459–481
- Vavalis, E.**, see **Rice, J.R.** (4) 459–481
- Wang, K. and J. Zhang**, Multigrid treatment and robustness enhancement for factored sparse approximate inverse preconditioning (4) 483–500
- Watson, G.A.**, see **Griffiths, D.F.** (1,2) 1
- Zhang, J.**, see **Wang, K.** (4) 483–500
- Zou, J.**, see **Huang, J.** (3) 211–227
